Hi Michael,

Attached are some slides highlighting your role, responsibilities, and the impact you made during last year's AWS GenAI hackathon. I've also included a summary of the event statistics for your reference.

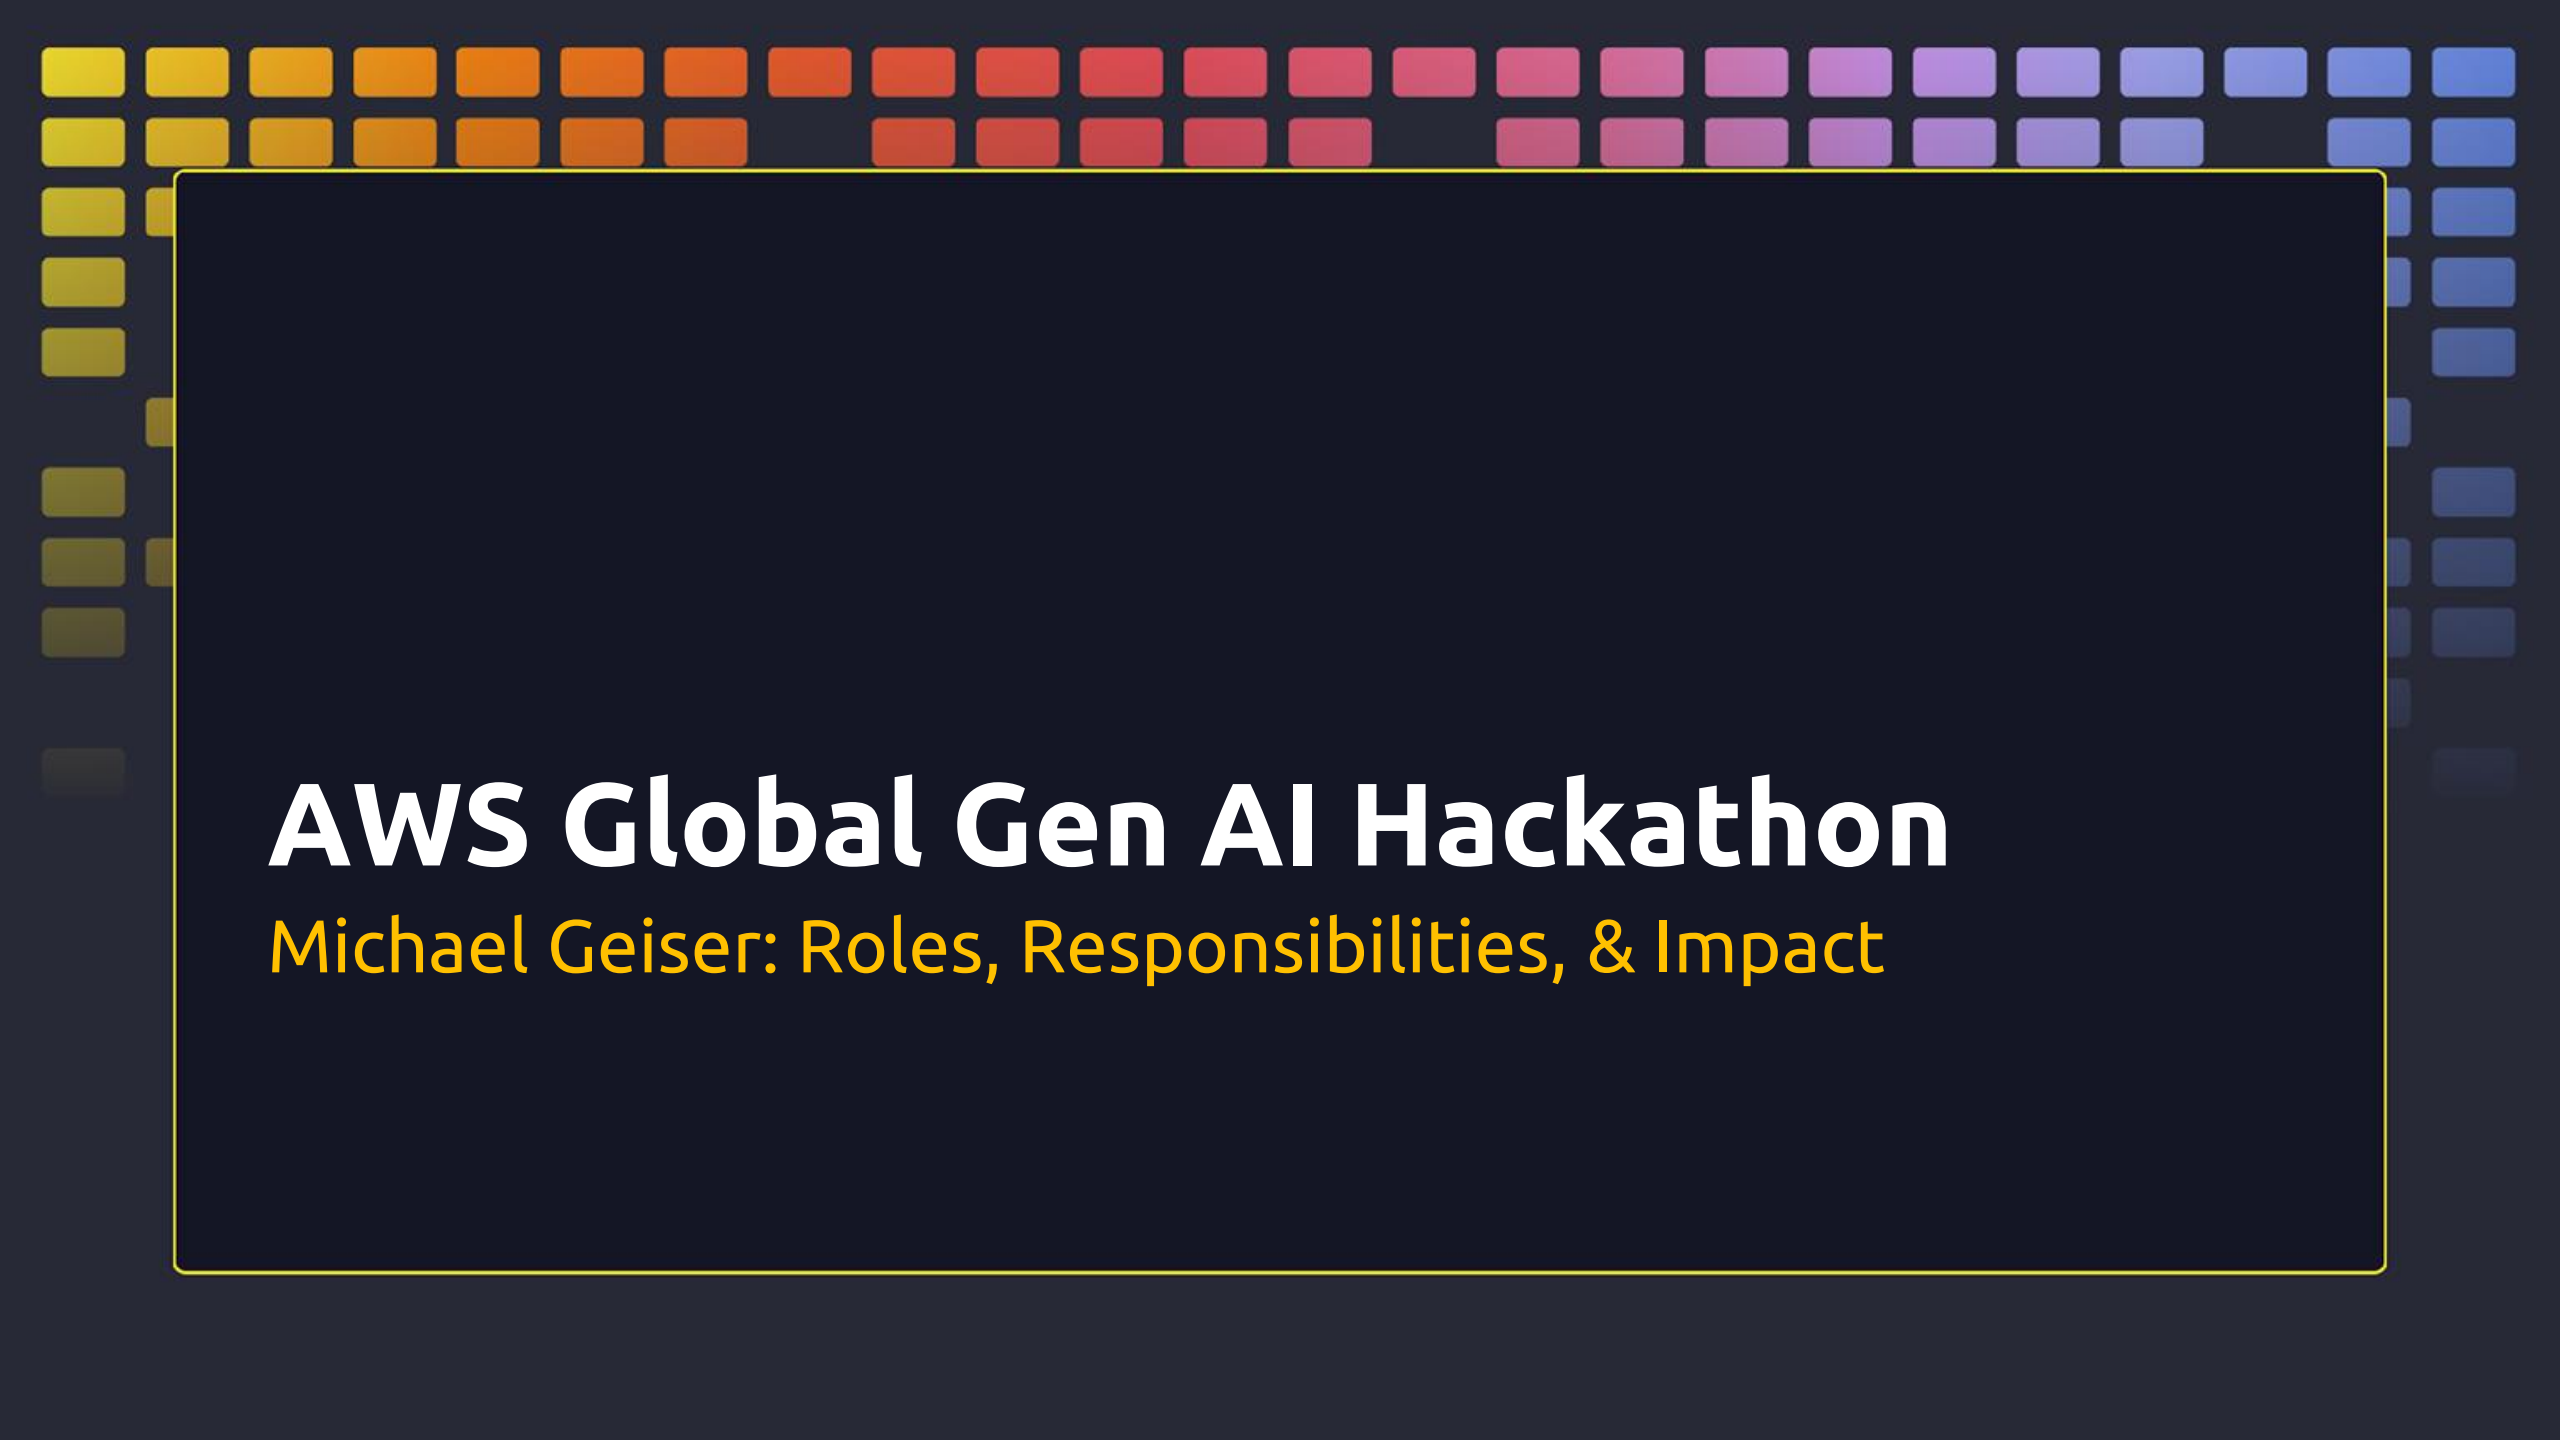

Let me know if you need anything else from my end!

Cheers,
Vicky

Vicky:

Thank you, that will be very helpful

AWS Global Gen AI Hackathon

Michael Geiser: Roles, Responsibilities, & Impact

Roles and Responsibilities

AWS Environment Setup & Management

- Provisioned environments and tools for over 1,660 participants across 170 teams
- Served as the primary point of contact for all provisioning and tooling-related needs
- Managed the setup and maintenance of user identities to ensure secure access

Roles and Responsibilities

Hackathon oversight

- Verified availability of essential tools (e.g., CodeCommit) within the Cube account
- Oversaw the post-hackathon teardown, including account closures and cost optimization to prevent unnecessary spend

Mentors and Judges

- Acted as the lead coordinator for North America Capgemini mentor/judge recruitment, ensuring teams had access to expert guidance throughout the event

Impact as Noted by Hackers

- Provided an opportunity for hackers to explore AWS Gen AI tools
- Contributed to hackers aligning with the latest technology stack

Accelerated the creation of solutions that could be presented to customers, thereby driving their innovation agenda and increasing sales velocity.

Educated and upskilled thousands of Capgemini employees globally on the latest AWS Gen AI tools (Bedrock, SageMaker and Q Developer)
