

AWS Global

Agentic AI Hackathon

July 7 - July 20, 2025

Michael Geiser:
Roles, Responsibilities,
& Impact

In collaboration with

Business, meet agentic AI.

Roles and Responsibilities

AWS Environment Setup & Management

- Provisioned environments and tools for 3,280+ participants across 404 teams.
- Served as the primary point of contact for all provisioning and tooling-related needs.
- Managed the setup and maintenance of user identities to ensure secure access.

Roles and Responsibilities

Hackathon oversight

- Verified availability of essential tools (e.g., Amazon Bedrock) to hackers.
- Developed and communicated instructions for access to AWS Hackathon Environments.
- Oversaw the post-hackathon teardown, including account closures and cost optimization to prevent unnecessary spend.

First Round Judge

- Served as a first-round judge to evaluate a subset of the 137 final submissions to determine the final 9 finalists.

Impact as Noted by Hackers

- Provided an opportunity for hackers to explore AWS Generative and Agentic AI tools
- Contributed to hackers aligning with the latest technology stack

Accelerated the creation of solutions that could be presented to customers, thereby driving their innovation agenda and increasing sales velocity.

Educated and upskilled thousands of Capgemini employees globally on the latest AWS Gen & Agentic AI tools (Bedrock, SageMaker and Q Developer)
